Build Smart Build Green Build Urban

2006 Milwaukee Tour of Homes

August 27, 2006
1:00 pm – 4:00 pm

Come look inside three green residential projects in Milwaukee and visualize how luxurious, beautiful, and affordable green can be!

Riverwest Home

2911 N. Bremen Street

- Discover an integrated green energy system that achieves \$50/month heating bills
- Enjoy a rain barrel and garden water catchment system

Historic Walker's Point Home

602 S. 3rd Street

- Experience a geoexchange system using the earth's thermal mass to cool a home
- Breathe in the fresh, healthy air from non-toxic finishes as you marvel at reclaimed and recycled materials

Park Reed Fifth Ward Townhomes

538 S. 2nd Street

- Learn more about this future green development
- Project information available on day of tour at Pragmatic Construction offices across from site at 255 W. Bruce Street

This self-guided tour will include information on green technologies, methods, and materials incorporated into each project as well as financial information related to the cost of construction and operations.

Drop by any and / or all of the project sites during the open house and enjoy light refreshments. A \$10 donation per family will be collected at your first stop on the tour to benefit the Sustainable Materials Resource Library housed at Milwaukee's Urban Ecology Center.
